

\$5 Challenge Grading Rubric

	Minimal	Moderate	Thorough
1. Teams share the process of problem identification and solution generation. (e.g., Teams share the thought process of selecting a particular problem to solve and how solutions were generated.)			
2. Teams share how/why a particular solution was identified, chosen, and developed.			
3. Creativity and resourcefulness were utilized in developing a solution within financial limitations.			
4. Effort was made to develop the product/service solution (high level of detail, specificity, workability, design parameters, prototype, actual product delivered)			
5. Progress was made in validating demand for product/service solution (e.g., prospective customer feedback was collected, pre-sales were made, actual sales of product/service)			
6. Final thoughts on viability of idea – potential future directions of idea based on market feedback.
